# Bacterial transformation pre lab questions answers

## Bacterial Identification Virtual Lab Student Worksheet

### BACTERIAL IDENTIFICATION LAB WORKSHEET

**INTRODUCTION**  
Go to <http://www.hmi.org/biointeractive/explore-virtual-labs>. Scroll down and click on The Bacterial Identification Virtual Lab. Maximize the screen if you wish. Answer the following questions in the spaces provided.

1. What is the overall purpose of this virtual lab?
  2. What are the four basic steps involved in this bacterial identification lab?
  3. What is "16S rDNA," and how is it used to identify species of bacteria?
- Click to Enter the Lab. (Click the window on the left-hand side of the screen to enter the lab.) As you enter the lab, follow the instructions in the lab (left-hand window). Using the information in the Notebook window on the right, answer the following questions.
- PART 1: SAMPLE PREPARATION**
4. As the pathology lab technician, what is your task in this virtual lab?
  5. Extracting DNA involves which initial step?
  6. What is the wire ring used for?
  7. Why are the proteolytic enzymes necessary?
  8. Why do you then need to inactivate the proteolytic enzymes and how do you do it?
- Published January 2011  
www.BioInteractive.org Page 1 of 7

1. On which of the plates would you expect to find bacteria most like the original non-transformed E. coli colonies you initially observed? Explain your predictions.
2. If there are any genetically transformed bacterial cells, on which plate(s) would they most likely be located? Explain your predictions.

1. What are the 6 stages of transformation? Treated squid are spread on the Ampicillin-containing agar. 5. What are the four unsafe practices to avoid? The squid are incubated for 24 hours. 6. Only E-colons. What are the four unsafe practices to avoid? Never have food on the work surface. 2. Never read the petri dish or culture tube cover on the lab bench. In the case of petri or culture tube. Never touch a tool that touches bacteria. 4. Never throw biohazard materials into regular trash. Coli that have been transformed with Amp<sup>r</sup> gene growth. The squid are shocked with heat at 42 degrees C. An amphitheater takes on the foreign DNA and expresses the foreign gene. A sentient form of penicillin used mainly to treat urine and respiratory infections is a subtype of nutrient agar that can be used for routine cultivation or not particularly fastidious organisms, do not preferentially grow Type of bacteria over other millions individual bacterial in a small area in Gentar Escherichia Coli; The most common bacteria in the human intestine, reproduces rapidly, does not have a true nucleus, all the DNA found in a single chromosome, contains small plasmids circular DNA losses that exist outside the main bacterial chromosome and carry their fun prpprias, used to introduce foreign bactA @lulas gene in some plasmMons that confer resistanceAbs cA @lulas of antibi ampicillin 3 tit that will contain the Amp<sup>r</sup> plasm that can survive and form hair cells in the Big LB supplemented with cA @ampicillin squid without the Plasma Amp<sup>r</sup> and therefore sens (killed by) the anti-DNA squid The cA @lula are competent through the clcium chloride and the Human shock log phase of the time period Bacterial of the Rapid Squid Division, following its stage of lag (slow growth of the colon due to the small number of ceases division), the duration of the period depends on the incubation temperature What are five estimated time to practice? -RPR Cells are they are .bal .bal gnivael erofeb retaw toh dna paos htiv sdnah hsaW .5.emalf fo ecneserp ni selggog esu dna koab dellup riah peek 4.yllufearc sloot elirets lla nepO .3.semit lla ta ti revo ro ti no hsid irtep fo dil peeK .2.gninnigeb erofeb ecafrus skrow dna sdnah hsaW ?noitamrofsnart citeneg si tahW .3ylno sillec latnemirepxe ot dedda sdmsalp Rpma .2noitulos 2lCaC dloc ot
